

**“Virtual Workshop in Dentistry for Collaborative Research
between
Tokyo Medical and Dental University
and
The Center of Dental Medicine at the University of Zurich”**

Virtual Workshop in Dentistry for Collaborative Research between Tokyo Medical and Dental University (TMDU) and The Center of Dental Medicine at the University of Zurich (UZH) was held on July 3rd and 10th (16:00-18:00/18:30 JST) via Web conferencing system to decide on themes and partners for the collaborative research between TMDU and UZH.

We are very happy to have this collaboration opportunity and establish the new bond between our high ranked universities.

Through this WS, we expected to achieve collaborative research in the fields of Gerodontology, Prosthodontics, Digital Dentistry, Periodontology, Cariology and Operative Dentistry, Oral Development, Oral Surgery, Implantology, Pediatric Dentistry and Orthodontics.

TMDU fosters not only student international exchange but also faculty international exchange and such global networking and further collaboration would have a great impact on the future of dentistry in this global era.
